

## **Miami International Airport Selects Everbridge to Deliver Critical Communications**

December 10, 2015 4:55 PM ET

### ***Everbridge is a Leading Provider of Incident Management and Emergency Communication Solutions for U.S. and Florida Airports***

BURLINGTON, Mass.-[Everbridge](#), a global provider of SaaS-based unified critical communications solutions, has been selected by the Miami-Dade Aviation Department to support security, incident response and resiliency at Miami International Airport (MIA) through its sophisticated and reliable critical communications platform. The airport will deploy Everbridge's incident management and secure mobile solutions to automate, customize and deliver communications to key employees, responders and passengers.

Everbridge is a leading provider of incident management and critical communication solutions for U.S. airports—currently serving 21 of the top 25 airports in North America by passenger volume, and more than 50 U.S.-based international and regional airports. In addition to MIA, Everbridge's solutions are deployed by numerous other airports in the state of Florida, including 100% of Large Hub Airports in the State.

"We're excited to invite Miami International into our family of U.S.-based airports to provide them with a secure solution that can minimize errors for communications during all types of incidents," said Jaime Ellertson, CEO of Everbridge. "We continue to generate clear momentum with leading airports across the country, and look forward to continued partnerships with airports and other organizations throughout Florida."

"Everbridge excels at near real-time communication, and we look forward to adding their innovative services to our incident response protocol, as we continue to enhance our internal and external communication systems," said Miami-Dade Aviation Director Emilio T. González.

### **About Everbridge**

Everbridge is a global provider of SaaS-based unified critical communications solutions. During mission-critical business events or man-made or natural disasters, the Everbridge platform enables customers to quickly and reliably deliver the right message and reach the right people, on the right device, in the right location, at the right time. Utilizing sophisticated communications technologies, Everbridge has the ability to deliver and verify messages in near real-time to more than 100 different communication devices, in over 200 countries and territories, in multiple languages – all simultaneously. Everbridge is based in Boston and Los Angeles, with additional offices in San Francisco, Beijing and London.
