BURLINGTON, Mass.--(BUSINESS WIRE)--Feb. 4, 2021-- Please replace the release dated February 1, 2021, with the following corrected version due to revisions.

This press release features multimedia. View the full release here: <https://www.businesswire.com/news/home/20210201005281/en/>

The updated release reads:

### **JACKSON MEMORIAL, AMONG WORLD'S LARGEST HOSPITALS, DEPLOYS EVERBRIDGE SOFTWARE TO STREAMLINE COVID-19 VACCINE DISTRIBUTION, REPRESENTING GROWING ADOPTION IN THE HEALTHCARE INDUSTRY**

*Public and Private Sector Demand Grows for Everbridge Critical Event Management (CEM) Software Supporting the Vaccine Rollout, Following Rapid Deployments by the State of West Virginia, Leon County Dept. of Health, Sarasota County in Florida, and More*

[Everbridge](#), Inc. (NASDAQ: EVBG), the global leader in critical event management ([CEM](#)), today announced that a growing number of organizations across industry verticals, including healthcare and government, selected Everbridge to support COVID-19 vaccine distribution with

risk insights, logistics awareness and vaccine appointment management. Jackson Memorial Hospital, among the world's largest hospitals and the third-largest teaching hospital in the U.S. with more than 1,550 licensed beds, became the latest healthcare organization to use the company's software to streamline vaccine distribution among its healthcare professionals.

In January 2021, Everbridge launched [COVID-19 Shield™: Vaccine Distribution](#) an extension to its CEM platform supporting the full spectrum of organizations that develop, manufacture, transport, distribute, regulate, and administer the coronavirus vaccine. The offering also provides governments with a single, unified platform to expedite vaccine coordination, communication and distribution for residents. Recent deployments of Everbridge's CEM Platform to power the digital vaccination distribution system, include [the entire state population of West Virginia](#), [Leon County Department of Health](#), [the County of Sarasota, Florida](#), and other public and private sector organizations.

With Everbridge's COVID-19 Shield™: Vaccine Distribution, enterprise customers gain capabilities to: coordinate the number of employees who have been vaccinated, manage population density and access to office buildings based on vaccination status, and receive timely alerts when employees report signs of illness so they can quickly respond to safeguard staff and visitors.

For governments, Everbridge enables state, city and county leaders to rapidly coordinate communication across the population, automate appointment signup and monitor registrations, track vaccine availability, ensure doses are shipped to proper facilities to avoid spoilage, and enable citizen scheduling to avoid long waits and call center challenges.

Dr. Clay Marsh, M.D., COVID-19/Coronavirus Czar for West Virginia, spoke about the state's success with vaccine scheduling and deployment utilizing the Everbridge's [COVID-19 Shield™: Vaccine Distribution](#) on [CNN](#) last week, "We have started what I believe is the first program in the country where we're partnering with a digital identification and communication system called Everbridge, where we are now starting to pre-register every West Virginian in the state and we're using an online portal and a phone portal for people who don't have that capacity to go online. We're creating a large queue that then sits people in the queue based on our priority and based on when they put their name in, and this system interacts and interfaces back and forth for them. And so we have backups that are available if our initial doses are not utilized and having that backup plan but staying within your prioritization scheme, I think, is an important factor of success."

"Facing the tremendous complexity of COVID-19 vaccine distribution and management, a growing number of organizations now rely on Everbridge to

help them automate and streamline these essential processes,” said David Meredith, CEO of Everbridge. “Everbridge’s [COVID-19 Shield™: Vaccine Distribution](#) enables government, healthcare and all types of businesses to protect the health and safety of their constituents, maintain vital communications and roll-out more effective and efficient vaccination distribution plans during this crucial phase of the COVID-19 global pandemic.”

## Cautionary Language Concerning Forward-Looking Statements

This press release contains “forward-looking statements” within the meaning of the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995, including but not limited to, statements regarding the anticipated opportunity and trends for growth in our critical communications and enterprise safety applications and our overall business, our market opportunity, our expectations regarding sales of our products, our goal to maintain market leadership and extend the markets in which we compete for customers, and anticipated impact on financial results. These forward-looking statements are made as of the date of this press release and were based on current expectations, estimates, forecasts and projections as well as the beliefs and assumptions of management. Words such as “expect,” “anticipate,” “should,” “believe,” “target,” “project,” “goals,” “estimate,” “potential,” “predict,” “may,” “will,” “could,” “intend,” variations of these terms or the negative of these terms and similar expressions are intended to identify these forward-looking statements. Forward-looking statements are subject to a number of risks and uncertainties, many of which involve factors or circumstances that are beyond our control. Our actual results could differ materially from those stated or implied in forward-looking statements due to a number of factors, including but not limited to: the ability of our products and services to perform as intended and meet our customers’ expectations; our ability to successfully integrate businesses and assets that we may acquire; our ability to attract new customers and retain and increase sales to existing customers; our ability to increase sales of our Mass Notification application and/or ability to increase sales of our other applications; developments in the market for targeted and contextually relevant critical communications or the associated regulatory environment; our estimates of market opportunity and forecasts of market growth may prove to be inaccurate; we have not been profitable on a consistent basis historically and may not achieve or maintain profitability in the future; the lengthy and unpredictable sales cycles for new customers; nature of our business exposes us to inherent liability risks; our ability to attract, integrate and retain qualified personnel; our ability to maintain successful relationships with our channel partners and technology partners; our ability to manage our growth effectively; our ability to respond to competitive pressures; potential liability related to privacy and security of personally identifiable information; our ability to protect our intellectual property rights, and the other risks detailed in our risk factors discussed in filings with the U.S. Securities and Exchange Commission (“SEC”), including but not limited to our Annual Report on Form 10-K for the year ended December 31, 2019 filed with the SEC on February 28, 2020. The forward-looking statements included in this press release represent our views as of the date of this press release. We undertake no intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. These forward-looking statements should not be relied upon as representing our views as of any date subsequent to the date of this press release.
