

## JARVISS, Powered by Everbridge, is Now the U.S. Army's Enduring Enterprise System for Threat Visibility

October 30, 2018

*Everbridge platform to support Department of Defense antiterrorism program to keep military personnel and facilities safe; U.S. Army is first to leverage JARVISS in branch-wide rollout*

BURLINGTON, Mass.--(BUSINESS WIRE)--Oct. 30, 2018-- [Everbridge](#), Inc. (NASDAQ: EVBG), the global leader in critical event management and enterprise safety software applications to help keep people safe and businesses running, today announced that JARVISS (Joint Analytic Real-Time Virtual Information Sharing System) is now the U.S. Army's enduring enterprise system for threat visibility. The Everbridge platform is powering JARVISS, creating a premier global threat information sharing system that will help enable the Army to effectively and efficiently identify and assess incidents and threats, in close proximity to military facilities, in a near real-time environment.

The Everbridge Critical Event Management (CEM) platform will be used by the Army to transform global threat information originating from more than 80,000 open sources (including social media, news media, local municipality services, commercial business, and government sources) into actionable information, providing the Army an enterprise system for sharing and reporting threat information and mitigating risk across Army bases and facilities around the world. Prior to JARVISS, the Army lacked a centralized system for real-time, unclassified, threat information-sharing as terrorist attacks or related incidents unfolded. The Department of Defense (DoD) directed the Army to develop a solution to better protect U.S. military personnel and interests following the shootings at military installations in Fort Hood and Chattanooga. The Army's Office of the Provost Marshal General selected the JARVISS platform provided by Everbridge as a joint solution for the problem.

"U.S. Army bases like Fort Hood, standalone facilities such as recruiting stations, and Reserve and National Guard operational units, all demonstrate the diversity of the Army and its integration with local communities, both in the U.S. and abroad," said Mr. Alex Mascelli, Army Antiterrorism Division Chief. "The complexity of threats and the overwhelming need for information sharing among the various DoD Components, Military Services, and Federal law enforcement communities is critical to countering terrorist activities and protecting our military personnel. The Everbridge critical event management platform is instrumental to JARVISS' ability to provide a common operating threat picture for real-time situational awareness and response management to protect all Army personnel and assets."

Powered by Everbridge, JARVISS will help enhance the Army's ability to receive and catalog hazardous events, suspicious activities and threat information, providing users the ability to view threat information before, during and after an incident. The Everbridge platform enables JARVISS users to geo-locate DoD assets in a potential impact zone and disseminate and share information through the JARVISS Mobile App, text alerts, e-mails and other modalities.

In addition to protecting the Warfighter through a common operational picture for real-time threat alerting, JARVISS is designed with a multi-tier architecture to collaborate with other agencies including law enforcement, emergency management, and civil defense to share information and control access based on trust levels of users and platforms.

"The Everbridge team is honored to power JARVISS and provide 48,000 Army users worldwide with threat intelligence and data to protect our soldiers and their families across our nation and around the world," said Jaime Ellertson, CEO of Everbridge. "Increasing the collaboration between the U.S. Army, other DoD components and Federal partners is a critical part of the Army's antiterrorism strategy and how it organizes for success. At Everbridge, we share a deep sense of responsibility towards those who keep us safe."

JARVISS received a DoD Risk Management Framework (RMF) Authority to Operate in April 2018. JARVISS is currently being rolled out Army-wide with pilots planned for other services and government agencies over the coming year.

### About Everbridge

[Everbridge](#), Inc. (NASDAQ: EVBG) is a global software company that provides enterprise software applications that automate and accelerate organizations' operational response to critical events in order to keep people safe and businesses running. During public safety threats such as active shooter situations, terrorist attacks or severe weather conditions, as well as critical business events including IT outages, cyber-attacks or other incidents such as product recalls or supply-chain interruptions, over 4,000 global customers rely on the company's Critical Event Management Platform to quickly and reliably aggregate and assess threat data, locate people at risk and responders able to assist, automate the execution of pre-defined communications processes through the secure delivery to over 100 different communication devices, and track progress on executing response plans. The company's platform sent over 2 billion messages in 2017 and offers the ability to reach over 500 million people in more than 200 countries and territories, including the entire mobile populations on a country-wide scale in Sweden, the Netherlands, the Bahamas, Singapore, Greece, Cambodia, and a number of the largest states in India. The company's critical communications and enterprise safety applications include Mass Notification, Incident Communications, Safety Connection™, IT Alerting, Visual Command Center®, Crisis Commander®, Community Engagement™ and Secure Messaging. Everbridge serves 9 of the 10 largest U.S. cities, 8 of the 10 largest U.S.-based investment banks, all 25 of the 25 busiest North American airports, six of the 10 largest global consulting firms, six of the 10 largest global auto makers, all four of the largest global accounting firms, four of the 10 largest U.S.-based health care providers and four of the 10 largest U.S.-based health insurers. Everbridge is based in Boston and Los Angeles with additional offices in Lansing, San Francisco, Beijing, Kolkata, London, Oslo and Stockholm. ### Cautionary Language Concerning Forward-Looking Statements

This press release contains "forward-looking statements" within the meaning of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, including but not limited to, statements regarding the anticipated opportunity and trends for growth in our critical communications and

enterprise safety applications and our overall business, our market opportunity, our expectations regarding sales of our products, and our goal to maintain market leadership and extend the markets in which we compete for customers. These forward-looking statements are made as of the date of this press release and were based on current expectations, estimates, forecasts and projections as well as the beliefs and assumptions of management. Words such as "expect," "anticipate," "should," "believe," "target," "project," "goals," "estimate," "potential," "predict," "may," "will," "could," "intend," variations of these terms or the negative of these terms and similar expressions are intended to identify these forward-looking statements. Forward-looking statements are subject to a number of risks and uncertainties, many of which involve factors or circumstances that are beyond our control. Our actual results could differ materially from those stated or implied in forward-looking statements due to a number of factors, including but not limited to: the ability of our products and services to perform as intended and meet our customers' expectations; our ability to attract new customers and retain and increase sales to existing customers; our ability to increase sales of our Mass Notification application and/or ability to increase sales of our other applications; developments in the market for targeted and contextually relevant critical communications or the associated regulatory environment; our estimates of market opportunity and forecasts of market growth may prove to be inaccurate; we have not been profitable on a consistent basis historically and may not achieve or maintain profitability in the future; the lengthy and unpredictable sales cycles for new customers; nature of our business exposes us to inherent liability risks; our ability to attract, integrate and retain qualified personnel; our ability to successfully integrate businesses and assets that we may acquire; our ability to maintain successful relationships with our channel partners and technology partners; our ability to manage our growth effectively; our ability to respond to competitive pressures; potential liability related to privacy and security of personally identifiable information; our ability to protect our intellectual property rights, and the other risks detailed in our risk factors discussed in filings with the U.S. Securities and Exchange Commission ("SEC"), including but not limited to our Annual Report on Form 10-K for the year ended December 31, 2017 filed with the SEC on March 12, 2018. The forward-looking statements included in this press release represent our views as of the date of this press release. We undertake no intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. These forward-looking statements should not be relied upon as representing our views as of any date subsequent to the date of this press release.
